**METHODICAL RECOMMENDATION TO WRITING OF SECTION
ON A LABOUR IN THE QUALIFYING ROBOTS OF FUTURE ENGINEERS-
TEACHERS PROTECTION**

The final stage of training is the performance of the qualification of Bachelor or Master. It is this stage allows you to check the quality of the knowledge in their chosen specialty and ability to apply them to future professional activities. Successful defense of a Master degree student achievement is proof of educational level that characterizes the formation of intellectual qualities sufficient to assign it the appropriate qualifications. Given the priority of human life and health, the purpose of the section "Health" qualification is to develop for the creation of safe and healthy working conditions of teachers and students in the workplace during training and events, the exclusion of occupational injuries, diseases, poisonings, fires, explosions. This is achieved by a deep study of occupational safety, industrial hygiene and ergonomics, fire safety in terms organically related to the theme of work. A task is developed for future engineers-teachers from a section «labour protection» of qualifying work. Effective implementation of this section foresees in subsequent labour activity providing of guarantee of maintainance of health and capacity of teachers and pupils through an effective management a labour and forming of responsibility protection at public servants and specialists for collective and own security. At successive and high-quality preparation of future specialist of pedagogical direction on bases of labour protection the primary purpose of discipline will be attained is an improvement of terms of labour, increase of its productivity, prevention professional diseases, and to the production traumatism. The criterion for quality mastering basic steps and techniques to improve working conditions is the successful performance of the section "Health" in qualifying work. In carrying out this section pedagogical high school student must show ability to use methods of optimal conditions teaching staff and students, rational organization of educational process.

Key words: labour protection, qualifying work, methodical recommendations.
